Repair Kit for a Day Tour

Multi-tool

Duct tape

4-5 ski straps

Headlamp

Extra AAA batteries

Bivy sack, bothy bag or tarp

Lighter

Fire starter

Flagging tape

P-cord – 10-15 feet

1 large hose clamp (for binding failure. attach the boot to the ski/board)

Binding repair

- auger/drill bit for multi-tool or binding buddy

- plumbers putty or epoxy

- steel wool (helps screws grip)

- binding screws

- splitboard binding pin (if necessary)

- snowboard binding straps

Thin gauge wire

1 boot rivet or improvised boot rivet

Ski pole splint

Skin wax (spring/summer)

Ski scraper

Consider for longer trips:

Two key rings (replace a broken pack buckle)

Two small hose clamps and 2x3” pieces of old aluminum ski pole cut length wise or a piece of an aluminum can (ski pole repair)

Piece of a hacksaw blade

Titanium cup

Spare pole basket

Extra toe & heel piece
